INDEPENDENT AUDITOR'S REPORT

To the Board of Supervisors Southeast SWCD Technical Support JPB **Goodhue, Minnesota**

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities and the General Fund of the Southeast SWCD Technical Support JPB (the JPB) as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the JPB's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and the General Fund of the JPB as of June 30, 2020, and the respective changes in financial position and budgetary comparison for the general fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Board of Supervisors Page 2

Other Matters

Required Supplementary Information

Management has omitted the management's discussion and analysis that accounting principles generally accepted in the United Sates of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Accounting principles generally accepted in the United States of America require that the required supplementary information as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

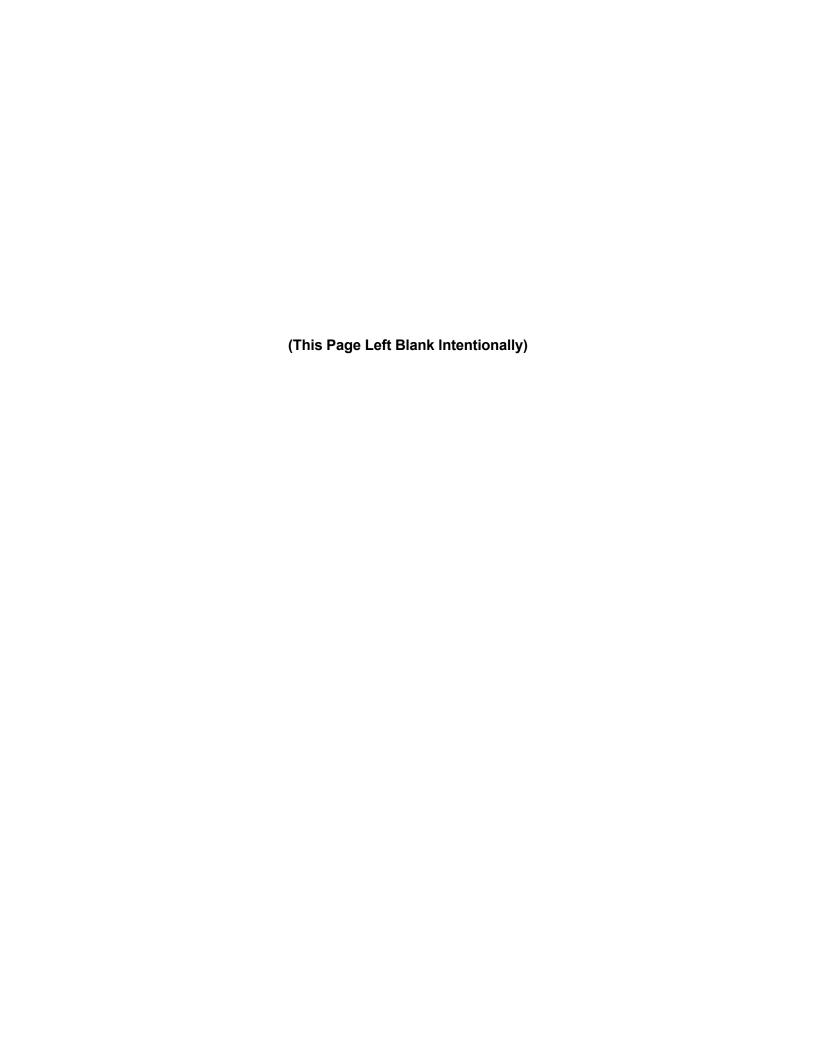

Smith, Schaffe and associates, Led.

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2020

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

The financial statements of the Southeast SWCD Technical Support JPB (the JPB) are prepared in accordance with generally accepted accounting principles (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard setting body for establishing governmental accounting and financial reporting principles. The following is a summary of the more significant accounting policies:

Financial Reporting Entity

The JPB is organized under the provisions of Minnesota Statutes Chapter 103C. The JPB is governed by a Board of Supervisors composed of five members nominated by voters of the JPB and elected to four-year terms by the voters of the County.

The purpose of the JPB is to assist land occupiers in applying practices for the conservation of soil and water resources. These practices are intended to control wind and water erosion, pollution of lakes and streams, and damage to wetlands and wildlife habitats.

The JPB provides technical and financial assistance to individuals, groups, districts, and governments in reducing costly waste of soil and water resulting from soil erosion, sedimentation, pollution and improper land use.

Each fiscal year the JPB develops a work plan which is used as a guide in using resources effectively to provide maximum conservation of all lands within its boundaries. The work plan includes guidelines for employees and technicians to follow in order to achieve the JPB's objectives.

Generally accepted accounting principles require that the financial reporting entity include the primary government and component units for which the primary government is financially accountable. Under these principles the JPB does not have any component units.

Government-Wide Financial Statements

The government-wide financial statements (the Statement of Net Position and the Statement of Activities) report information on all of the nonfiduciary activities of the JPB.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function.

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of cash flows. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

1. Summary of Significant Accounting Policies (Continued)

Fund Financial Statements

The JPB reports the General Fund as its only major governmental fund. The General Fund accounts for all financial resources of the JPB.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose the JPB considers all revenues, except reimbursement grants, to be available if they are collected within 60 days of the end of the current fiscal period.

Reimbursement grants are considered available if they are collected within one year of the end of the current fiscal period. Expenditures are recorded when a liability is incurred under accrual accounting.

Intergovernmental revenues are reported in conformity with the legal and contractual requirements of the individual programs. Generally, grant revenues are recognized when the corresponding expenditures are incurred.

Investment earnings are recognized when earned. Other revenues are recognized when they are received in cash because they usually are not measurable until then.

In accordance with GASB Statement No. 33, *Accounting and Financial Reporting for Nonexchange Transactions*, revenues for nonexchange transactions are recognized based on the principal characteristics of the revenue. Exchange transactions are recognized as revenue when the exchange occurs.

Budget Information

The JPB adopts an estimated revenues and expenditures budget for the General Fund. Comparisons of estimated revenues and budgeted expenditures to actual are presented in the financial statements in accordance with generally accepted accounting principles. Amendments to the original budget require Board approval. Appropriations lapse at year end. The JPB does not use encumbrance accounting.

Use of Estimates

The preparation of financial statements in conformity with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

1. Summary of Significant Accounting Policies (Continued)

Cash and Investments

Cash and investments are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition. Investments are stated at fair value.

Receivables

Receivables are collectible within one year.

Capital Assets

Capital assets are reported on a net (depreciated) basis. Capital assets are defined by the JPB as assets with an initial, individual cost of more than \$1,000 and an estimated useful life greater than one year. General capital assets are valued at historical or estimated historical cost.

The cost of property, plant and equipment is depreciated over the estimated useful lives of the related assets. Leasehold improvements are depreciated over the lesser of the term of the related lease or the estimated useful lives of the assets. Depreciation is computed on the straight-line method. For the purpose of computing depreciation, the useful life for machinery and equipment is five to ten years.

Deferred Outflows of Resources

In addition to assets, the financial statements will sometimes report a separate section of deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense) until that time. The JPB has one type of item which occurs related to revenue recognition. The deferred outflow of resources is pension related.

Unearned Revenue

Governmental funds and government-wide financial statements report unearned revenue in connection with resources that have been received, but not yet earned. Unearned revenue as of June 30, 2020 represents unearned advances from the Minnesota Board of Water and Soil Resources (BWSR) for administrative service grants and for the cost-share program. Revenues will be recognized when the related program expenditures are recorded.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

1. Summary of Significant Accounting Policies (Continued)

Compensated Absences Benefits

Under the JPB's personnel policies, employees are granted vacation leave in varying amounts based on their length of service. Vacation leave accrual varies from 4 to 7 hours per pay period. Sick leave accrual is 4 hours for each pay period. The limit on the accumulation of vacation leave is 200 hours and the limit on the accumulation of sick leave is 960 hours. Upon termination of employment from the JPB, employees who have completed their probationary period are paid accrued vacation leave and 60% of their accrued sick leave up to \$3,500.

The amount reported as compensated absences benefits consists of unpaid, accumulated vacation and sick balances. The liability has been calculated using the vested method, in which leave amounts are accrued for both employees who currently are eligible to receive termination payments and other employees who are expected to become eligible in the future to receive such payments upon termination. The liability is reported in governmental funds only if they have mature and is accrued when incurred in the government-wide statements.

Deferred Inflows of Resources

In addition to liabilities, the financial statements will sometimes report a separate financial statement element, deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The JPB has one type of item which occurs related to revenue recognition. The deferred inflow of resources is pension related.

Pensions

For purposes of measuring the net pension liability, deferred outflows/inflows of resources, and pension expense, information about the fiduciary net position of the Public Employees Retirement Association (PERA) and additions to/deductions from PERA's fiduciary net position have been determined on the same basis as they are reported by PERA except that PERA's fiscal year end is June 30. For this purpose, plan contributions are recognized as of employer payroll paid dates and benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Classification of Net Position

Net position in the government-wide financial statements is classified in the following categories:

<u>Investment in Capital Assets</u> – the amount of net position representing capital assets net of accumulated depreciation.

<u>Restricted Net Position</u> – the amount of net position for which external restrictions have been imposed by creditors, grantors, contributors, or laws or regulations of other governments; and restrictions imposed by law through constitutional provisions or enabling legislation.

<u>Unrestricted Net Position</u> – the amount of net position that does not meet the definition of net investment in capital assets or restricted.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

1. Summary of Significant Accounting Policies (Continued)

Classifications of Fund Balances

Fund balance is divided into five classifications based primarily on the extent to which the JPB is bound to observe constraints imposed upon the use of the resources in the General Fund. The classifications are as follows:

<u>Nonspendable</u> – the nonspendable fund balance category includes amounts that cannot be spent because they are not in spendable form, or are legally or contractually required to be maintained intact. The "not in spendable form" criterion includes items that are not expected to be converted to cash.

<u>Restricted</u> – fund balance is reported as restricted when constraints placed on the use of resources are either externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws and regulations of other governments; or are imposed by law through constitutional provisions or enabling legislation.

<u>Committed</u> – the committed fund balance classification includes amounts that can be used only for the specific purposes imposed by formal action (resolution) of the Board. Those committed amounts cannot be used for any other purposes unless the Board removes or changes the specified use by taking the same type of action (resolution) it employed to previously commit those amounts.

<u>Assigned</u> – amounts in the assigned fund balance classification the JPB intends to use for specific purposes that do not meet the criteria to be classified as restricted or committed. In the General Fund, assigned amounts represent intended uses established by the Board or the Board Administrator who has been delegated that authority by Board resolution.

<u>Unassigned</u> – unassigned fund balance is the residual classification for the General Fund and includes all spendable amounts not contained in the other fund balance classifications.

The JPB applies restricted resources first when expenditures are incurred for purposes for which either restricted or unrestricted (committed, assigned, and unassigned) amounts are available. Similarly, within unrestricted fund balance, committed amounts are reduced first followed by assigned, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of the unrestricted fund balance classifications could be used.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

2. Cash and Investments

Deposits

Minnesota Statutes 118A.02 and 118A.04 authorize the JPB to designate a depository for public funds and to invest in certificates of deposit. Minnesota Statute 118A.03 requires that all District deposits be protected by insurance, surety bond, or collateral. When not covered by insurance or surety bonds, the market value of collateral pledged shall be at least ten percent more than the amount on deposit (plus accrued interest) at the close of the financial institution's banking day.

Authorized collateral includes treasury bills, notes and bonds; issues of U.S. government agencies; general obligations rated "A" or better; revenue obligations rated "AA" or better; irrevocable standards letters of credit issued by the Federal Home Loan Bank; and certificates of deposit. Minnesota Statutes require that securities pledged as collateral be held in safekeeping in a restricted account at the Federal Reserve Bank or in an account at a trust department of a commercial bank or other financial institution that is not owned or controlled by the financial institution furnishing the collateral.

Custodial Credit Risk

Custodial credit risk is the risk that in the event of a bank failure, the JPB's deposits may not be returned to it. The JPB does not have a deposit policy for custodial credit risk. As of June 30, 2020, the JPB's deposits were not exposed to custodial credit risk.

Fair Value Measurement

Fair value measurements are determined utilizing the framework established by the Governmental Accounting Standards Board. The framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets
 or liabilities in active markets that the JPB has the ability to access
- Level 2: Inputs to the valuation methodology include:
 - o Quoted prices for similar assets or liabilities in active markets
 - Quoted prices for identical assets or liabilities in inactive markets
 - o Inputs other than quoted prices that are observable for the asset or liability
 - Inputs that are derived principally from or corroborated by observable market data by correlation or other means

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

2. Cash and Investments (Continued)

If the asset or liability has a specific (contractual) term, Level 2 input must be observable for substantially the full term of the asset or liability

 Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

There were no assets measured at fair value on a recurring basis noted at the JPB.

3. Capital Assets

Capital asset activity for the year ended June 30, 2020 was as follows:

Governmental Activities	Beginning Balance		Additions				Ending Balance	
Capital assets, being depreciated: Equipment	\$	271,398	\$	16,005	\$	\$	287,403	
Less accumulated depreciation for: Equipment		178,429		35,088			213,517	
Governmental activities capital assets, net	\$	92,969	\$	(19,083)	\$	\$	73,886	

Depreciation for the year ended June 30, 2020 was \$35,088.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

4. Long-Term Liabilities

The following is a summary of changes in long-term obligations for the year ended June 30, 2020.

	Beginning	A dditions	Dodustions	Ending	Amounts Due Within
	Balance	Additions	Reductions	Balance	One Year
Governmental Activities					
Compensated Absences	\$ 34,860	\$ 7,620	\$	\$ 42,480	\$

5. Risk Management

The JPB is exposed to various risks of loss related to torts, theft of, damage to, or destruction of assets; errors and omissions; injuries to employees; workers' compensation claims; and natural disasters. Property and casualty liabilities and workers' compensation are insured through Minnesota Counties Intergovernmental Trust. The JPB retains risk for the deductible portion of the insurance. The amounts of these deductibles are considered immaterial to the financial statements.

The Minnesota Counties Intergovernmental Trust is a public entity risk pool currently operated as a common risk management and insurance program for its members. The JPB pays an annual premium based on its annual payroll. There were no significant increases or reductions in insurance from the previous year or settlements in excess of insurance coverage for any of the past three fiscal years.

6. Fiscal Agent and Operating Leases

The Goodhue Soil and Water Conservation District is the fiscal agent for the JPB and provides office space.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

7. Defined Benefit Pension Plans – Statewide

Plan Description

The JPB participates in the following cost-sharing multiple-employer defined benefit pension plans administered by Public Employees Retirement Association of Minnesota (PERA). PERA's defined benefit pension plans are established and administered in accordance with *Minnesota Statutes* Chapters 353 and 356. PERA's defined benefit pension plans are tax qualified plans under Section 401 (a) of the Internal Revenue Code.

1. General Employees Retirement Plan (General Employees Plan (accounted for in the General Employees Fund))

All full-time and certain part-time employees of the JPB are covered by the General Employees Plan. General Employees Plan members belong to the Coordinated Plan. Coordinated Plan members are covered by Social Security.

Benefits Provided

PERA provides retirement, disability, and death benefits. Benefit provisions are established by state statute and can only be modified by the state legislature. Vested, terminated employees who are entitled to benefits but are not receiving them yet are bound by the provisions in effect at the time they last terminated their public service.

1. General Employees Plan Benefits

General Employees Plan benefits are based on a member's highest average salary for any five successive years of allowable service, age, and years of credit at termination of service. Two methods are used to compute benefits for PERA's Coordinated Plan members. Members hired prior to July 1, 1989, receive the higher of Method 1 or Method 2 formulas. Only Method 2 is used for members hired after June 30, 1989. Under Method 1, the accrual rate for Coordinated members is 1.2% for each of the first 10 years of service and 1.7% for each additional year. The rates are 2.2% and 2.7%, respectively, for Basic members. Under Method 2, the accrual rate for Coordinated members 1.7% for all years of service, and 2.7% for Basic members. For members hired prior to July 1, 1989 a full annuity is available when age plus years of service equal 90 and normal retirement age is 65. For members hired on or after July 1, 1989 normal retirement age is the age for unreduced Social Security benefits capped at 66.

Annuities, disability benefits, and survivor benefits are increased effective every January 1. Beginning January 1, 2019, the postretirement increase will be equal to 50 percent of the cost-of-living adjustment (COLA) announced by the SSA, with a minimum increase of at least 1 percent and a maximum of 1.5 percent. Recipients that have been receiving the annuity or benefit for at least a full year as of the June 30 before the effective date of the increase will receive the full increase. For recipients receiving the annuity or benefit for at least one month but less than a full year as of the June 30 before the effective date of the increase will receive a reduced prorated increase. For members retiring on January 1, 2024, or later, the increase will be delayed until normal retirement age (age 65 if hired prior to July 1, 1989, or age 66 for individuals hired on or after July 1, 1989). Members retiring under Rule of 90 are exempt from the delay to normal retirement.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

7. Defined Benefit Pension Plans – Statewide (Continued)

Contributions

Minnesota Statutes Chapter 353 sets the rates for employer and employee contributions. Contribution rates can only be modified by the state Legislature.

1. General Employees Fund Contributions

Coordinated Plan members were required to contribute 6.50 percent of their annual covered salary in fiscal year 2019; the JPB was required to contribute 7.50 percent for Coordinated Plan members. The JPB's contributions to the General Employees Fund for the year ended June 30, 2020 were \$26,774. The JPB's contributions were equal to the required contributions as set by the state statute.

Pension Costs

1. General Employees Fund Pension Costs

At June 30, 2020, the JPB reported a liability of \$270,910 for its proportionate share of the General Employees Fund's net pension liability. The JPB's net pension liability reflected a reduction due to the State of Minnesota's contribution of \$16 million. The State of Minnesota is considered a non-employer contributing entity and the state's contribution meets the definition of a special funding situation. The State of Minnesota's proportionate share of the net pension liability associated with the JPB totaled \$8,333. The net pension liability was measured as of June 30, 2019, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The JPB's proportion of the net pension liability was based on the JPB's contributions received by PERA during the measurement period for employer payroll paid dates from July 1, 2018 through June 30, 2019 relative to the total employer contributions received from all of PERA's participating employers. At June 30, 2019, the JPB's proportion was 0.0049 percent which was the same as its proportion measured as of June 30, 2018.

District's proportionate share of the net pension liability	\$ 270,910
State of Minnesota's proportionate share of the net pension	
liability associated with the District	 8,333
Total	\$ 279,243

For the year ended June 30, 2020, the JPB recognized pension expense of \$19,816 for its proportionate share of the General Employees Plan's pension expense. In addition, the JPB recognized an additional \$624 as pension expense (and grant revenue) for its proportionate share of the State of Minnesota's contribution of \$16 million to the General Employees Fund.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

7. Defined Benefit Pension Plans – Statewide (Continued)

Pension Costs (continued)

At June 30, 2020, the JPB reported its proportionate share of General Employees Plan's deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	ed Outflows esources	red Inflows esources
Difference between expected and actual economic experience	\$ 7,438	\$
Changes in actuarial assumptions		21,080
Difference between projected and actual investment earnings		30,144
Changes in proportion	23,491	
Contributions paid to PERA subsequent		
to the measurement date	 26,774	
Total	\$ 57,703	\$ 51,224

The \$26,774 reported as deferred outflows of resources related to pensions resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2021. Other amounts reported as deferred outflows and deferred inflow of resources related to pensions will be recognized in pension expense as follows:

Year Ending	Pensi	on Expense
June 30:		mount
2021	\$	4,631
2022		(19,939)
2023		(5,423)
2024		436

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

7. Defined Benefit Pension Plans – Statewide (Continued)

Actuarial Assumptions

The total pension liability in the June 30, 2019, actuarial valuation was determined using the following actuarial assumptions:

	General Employees Plan
Inflation	2.50% per year
Salary Growth	3.25% per year
Investment Rate of Return	7.50%

Salary increases were based on a service-related table. Mortality rates for active members, retirees, survivors, and disabilitants for all plans were based on RP 2014 tables for males or females, as appropriate, with slight adjustments to fit PERA's experience. Cost of living benefit increases after retirement for retirees are assumed to be 1.25 percent per year for the General Employees Plan, 1.0 percent per year for the Police and Fire Plan, and 2.0 percent per year for the Correctional Plan.

Actuarial assumptions used in the June 30, 2019 valuation were based on the results of actuarial experience studies. The most recent four-year experience study in the General Employees Plan was completed in 2019. The most recent four-year experience study for Police and Fire Plan was completed in 2016. The five-year experience study for the Correctional Plan, prepared by a former actuary, was completed in 2012. The mortality assumption for the Correctional Plan is based on the Police and Fire Plan experience study completed in 2016. Economic assumptions were updated in 2018 based on a review of inflation and investment return assumptions.

The following changes in actuarial assumptions occurred in 2019:

Changes in Actuarial Assumptions:

The mortality projection scale was changed from MP-2017 to MP-2018.

Changes in Plan Provisions:

 The employer supplemental contribution was changed prospectively, decreasing from \$31.0 million to \$21.0 million per year. The State's special funding contribution was changed prospectively, requiring \$16.0 million due per year through 2031.

The State Board of Investment, which manages the investments of PERA, prepares an analysis of the reasonableness on a regular basis of the long-term expected rate of return using a building-block method in which best-estimate ranges of expected future rates of return are developed for each major asset class. These ranges are combined to produce an expected long-term rate of return by weighting the expected future rates of return by the target asset allocation percentages. The target allocation and best estimates of geometric real rates of return for each major asset class are summarized in the table on the following page.

Actuarial Assumptions (continued)

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return		
, book diace		Trodi i rato di i rotani		
Domestic Stocks	35.5%	5.10%		
International Stocks	25.0%	5.90%		
Bonds	20.0%	0.75%		
Alternative Assets	17.5%	5.90%		
Unallocated Cash	2.0%	0.00%		
Total	100%			

Discount Rate

The discount rate used to measure the total pension liability in 2019 was 7.50 percent. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and employers will be made at the rates specified in Minnesota Statutes. Based on these assumptions, the fiduciary net position of the General Employees Fund was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Pension Liability Sensitivity

The following presents the JPB's proportionate share of the net pension liability for all plans it participates in, calculated using the discount rate disclosed in the preceding paragraph, as well as what the JPB's proportionate share of the net pension liability would be if it were calculated using a discount rate one percentage point lower or one percentage point higher than the current discount rate:

Sensitivity Analysis

Net Pension Liability at Different Discount Rates					
	General Em	General Employees Fund			
1% Lower	6.50%	\$	445,361		
Current Discount Rate	7.50%		270,910		
1% Higher	8.50%		126,866		

Pension Plan Fiduciary Net Position

Detailed information about GERP's fiduciary net position is available in a separately-issued PERA financial report that includes financial statements and required supplementary information. That report may be obtained on the Internet at www.mnpera.org.

OTHER REPORT SECTION

JUNE 30, 2020

MINNESOTA LEGAL COMPLIANCE

Independent Auditor's Report

To the Board of Supervisors Southeast SWCD Technical Support JPB Goodhue, Minnesota

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of Southeast SWCD Technical Support JPB, Goodhue, Minnesota, as of and for the year ended June 30, 2020, and the related notes to financial statements, which collectively comprise the JPB's basic financial statements and have issued our report thereon dated October 26, 2020.

The Minnesota Legal Compliance Audit Guide for Political Subdivisions, promulgated by the State Auditor pursuant to Minn. Stat. § 6.65, contains six categories of compliance to be tested: contracting and bidding, deposits and investments, conflicts of interests, tax increment financing, claims and disbursements, and miscellaneous provisions. Our audit considered all of the listed categories, except that we did not test for compliance with the provisions for tax increment financing public because the JPB does not administer any tax increment financing districts.

In connection with our audit, nothing came to our attention that caused us to believe that the JPB failed to comply with the provisions of the *Minnesota Legal Compliance Audit Guide for Political Subdivisions*. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance. Accordingly, had we performed additional procedures, other matters may have come to our attention regarding the JPB's noncompliance with the above referenced provisions.

This report is intended solely for the information and use of those charged with governance and management of Southeast SWCD Technical Support JPB and the State Auditor and is not intended to be and should not be used by anyone other than these specified parties.

Red Wing, Minnesota October 26, 2020
